SUBJECT: ADOPTION AND FOSTER CARE ANALYSIS AND REPORTING SYSTEM  
(AFCARS) ASSESSMENT REVIEW

The purpose of this letter is to notify counties of an upcoming federal review of California's Adoption and Foster Care Analysis and Reporting System (AFCARS) scheduled for June 2004.

Federal law and regulation (45 CFR 1355.40) require states to collect case-level data on children in foster care and on children who have been adopted through the states' child welfare agencies. The federally mandated data system used to collect this data is called AFCARS. AFCARS data is used for many purposes, including determining and assessing outcomes for children and families. Additionally, each state's Statewide Automated Child Welfare Information System (SACWIS) is required to collect AFCARS data. California's Child Welfare Services/Case Management System (CWS/CMS) is our SACWIS.

The federal Department of Health and Human Services' Administration for Children and Families (ACF) conducts AFCARS Assessment Reviews in each state to assess the accuracy of data collected, in accordance with the AFCARS data element definitions (Attachment 1 lists, and briefly describes, the data elements required by ACF). The review tests and verifies a state's effectiveness and accuracy in collecting, extracting, and transmitting AFCARS data to ACF. A state's AFCARS file (report) must include case level information regarding all children in foster care, for whom the state Title IV-B/IV-E agency has responsibility for placement, care or supervision. The AFCARS file must also report data on all adopted children who were placed by the state Title IV-B/IV-E agency, and on all adopted children for whom the state agency is providing adoption assistance, care or services directly, or by agreement with other private or public agencies.

Two major areas will be assessed during the review: (1) the AFCARS general requirements to report on foster care and adoptions and (2) the AFCARS data elements. A state is rated on a scale of 1 to 4, with "1" indicating non-compliance in meeting AFCARS standards and "4" indicating complete conformance with AFCARS standards. AFCARS standards are based upon a state's conformance with AFCARS regulation, policy, technical bulletins, and the quality of data submitted by the state to ACF.

All County Information Notice  
Page Two

California has been tentatively scheduled for an AFCARS review in June 2004. Many steps must be taken in preparation for this review. One of the first steps in preparing for the review is to form a state team that will work with the federal team. The members of the state and federal teams will be responsible for implementing all of the assigned activities associated with the review (see Attachment 2 for listing of activities). It is our intention to form a small state/county joint work group in early 2004 to assist in planning and conducting the review.

Counties may be asked to participate on the state review team; counties will also be indirectly involved in the AFCARS Assessment Review because the counties' use of CWS/CMS directly reflects upon the quality, accuracy, and completeness of the data entered into CWS/CMS. In the upcoming months, counties will be notified as more definitive information about the upcoming review becomes available.

Part of the assessment review includes a case file review. Field staff (for example, front line case workers and supervisors) will be expected to participate in the case file review. The number of staff participating may be decided by the state. The purpose of a case file review is to compare the state's AFCARS data, sent to ACF, with the information in paper case files. The sample of foster care and adoption cases reviewed on-site will be randomly selected from the most recent AFCARS data sent to ACF. The sample will consist of a specified number of foster care and adoption case records. These records will be delivered to the state office by the first day of the on-site review.

If California does not fully satisfy the AFCARS standards, an AFCARS Improvement Plan will be developed, and California will be required to make the changes to its SACWIS (CWS/CMS) and/or data entry processes to satisfy the applicable data requirements and standards.

You will be informed of any updates received from ACF regarding the AFCARS review. We thank you in advance for your cooperation. If you have any questions regarding this letter, please contact Kirsten Salomon of the CMS Support Branch at (916) 657-1655.

Sincerely,

<b>AFCARS Element</b>	<b>Requirement</b>
#1 State (core)	Must be the correct code for the State.  Best if system hard-coded
#2 Report Period Ending Date (core)	
#3 Local FIPS Code (core)	Should be the code of the office responsible for the case - not the residence of the child.
#4 Record Number (core)	Must not be actual case number, should not be linked to the child except at the State or local level.  State must be using a unique identifier that remains the person's identifier.  The AFCARS record number must be right justified and padded with zeros to fill out the 12 character field.
#5 Most Recent Periodic Review Date	Should be the most recent review for the <b>current removal episode</b> .  Must be actual review date and not the due date for the next review.  Must not include supervisory reviews, should only be reviews that meet the standards of Title IVB, Section 422(b)(10), of the Social Security Act.  Should not include a review date after the end of the current report period.  "An entry in this field certifies that the child's computer record is current up to this date." Does the agency require a review of the accuracy of the information in the automated system at the same time that all aspects of
